

Parent Feedback

The Early Childhood Education Preschool Lab At Eastern View High School was a great experience for my daughter, although she was there for a minimal amount of time (enrolled at the end of the school year) she learned many new things both academically and socially, I would definitely recommend this program for any parent !

I personally want to say that this program is THE BEST! We were so grateful to hear that this program was coming to the Culpeper area. We were looking for a program, that wasn't a "daycare" but a "preschool" program. We wanted a program that was going to teach curriculum, and have as much personalized attention as possible for our four-year-old, and of course, it needed to be affordable. The EVHS Child Lab was the answer! It exceeded all expectations in every area; location, equipment, staff, student teachers, time schedules. We have recommended this program to many in our community. As a family, this program was a wonderful experience in every way, and a real delight for all involved. We hope that you all have much success in the years to come. Thanks again for all your hard work, best wishes to all.

- The Schmecko Family

Our son, Alex, came to the preschool program as a 4 yr old not being able to recognize many letters or numbers and hesitant about being in school. He made such an improvement after just the first month and by the end of the school year he became a completely different child! He looked forward going to school every day and came home with wonderful art projects, learned many songs, and told us endless stories about what he learned from his teachers and all the fun he had with the friends he made. The high school students provide individual attention, care and love to the preschoolers. We believe that is the reason why our son gained so much from it academically and socially. As parents, we are so proud that Alex graduated from this wonderful program and was awarded "Student of the Year". Most importantly, we are proud that we placed our son in the EVHS preschool program, because he is prepared and enthused to start elementary school, and scored a 92% on the kindergarten entrance exam!

My daughter was very shy when she started pre-school and the individual attention that she got from her "big helper" really helped her come out of her shell. Mrs. McDowell is the most amazing teacher. She worked so hard to educate the high school students on how to work with the preschoolers. I am so thankful that I found this program. I would recommend it to anyone looking for a preschool.
